

*Hand painted tableware*

MILANO

Founded in 1975 by Anna & Luciano Baroni, Baroni Porcellane is today directed by their daughter Cristina.

Time has passed, but their dedication in the pursuit of perfection never will, Cristina and her staff of decorators have a treasured knowledge that has been handed down through generations.

Baroni Porcellane are specialists in tableware products, made from fine Limoges porcelain and entirely hand-painted in Italy.

The philosophy is to create a personalized, elegant and welcoming tableware set for each customer, where traditional values can fit into a modern environment.

Our hand-painted decorations and the very wide range of colors available, provide our customers with fully customizable designs and table color schemes.

We perfectly match our porcelains with hand embroidered tablecloths, glasses and flatware taking inspiration from interior designs or, for an even more customized service, based on furniture projects or existing furniture.

Baroni Porcellane creates more than a simple tableware; it's a lifestyle.

# Index

- 
- A hand is shown painting a decorative pattern on a white plate. The pattern consists of a series of connected, stylized floral or scroll-like motifs. The hand is holding a brush and applying a light brown or tan color to the design. The background is a soft, out-of-focus light color.

# Yacht table

On demand we realize collections for yachts  
with a wide range of porcelains, glasses and table linen.

# Care and maintenance

## **Advantages of Limoges porcelain**

Cristina Baroni personally selects the porcelain to decorate preferring those produced in Limoges in France.

This porcelain is made from Kaolin, sand, feldspathic materials, clays, chalk and is fired at very high temperature.

It has a great reputation for its fineness and benefits from a very considerable resistance to both thermal and mechanic shock. It is non-porous and does not produce a network of fine cracks on the surface, which gives it a very high hygienic quality in respect to European environmental standards.

## **Maintenance of the decoration**

Our hand painted decorations are fired between 750° and 850 °, the colors are lead and cadmium free and comply with EU and US regulations.

The colors do not change with the passage of time, however we do not recommend daily dish-washing especially for those that contain gold or platinum.

In case of use of dishwashing machine, make sure that at the end of the cycle the items come out perfectly dry otherwise wipe them thoroughly by hand with a soft cloth.

We suggest to use branded dish-washing products which will guarantee an efficient and not too harsh wash.

Never use any type of scraper or steel wool-which will scratch the surface of the items.

Do not leave food residue for a long time on decorated parts, such as salt, lemon or vinegar to prevent corrosion.

If the decoration contains details in gold or platinum, you cannot put it in the microwave oven.

## **Flatware**

### **Stainless steel**

Forks, spoons and handles of hollow handle knives: austenitic stainless steel, type AISI 304 (18/10), highly resistant to corrosion. Blades and solid handle knives: martensitic stainless steel, type AISI 420, particularly suitable to be sharpened and to keep a long-lasting cutting edge.

### **Titanium coating**

The titanium coating is a metal surface treatment obtained with a process based on Physical Vapor Deposition (PVD) technology that enables the creation of metallic vapors in a vacuum. These vapors which can also be partially ionized, allow the creation of metallic compounds through the introduction of reactive gases in the vacuum chamber.

This procedure permits the formation of a highly adherent thin film, with exceptional chemical and physical characteristics.

### **Maintenance of flatware**

In case of use of dishwashing machine, make sure that the end of the cycle the items come out perfectly dry otherwise wipe them thoroughly by hand with a soft cloth.

We suggest to use branded dish-washing products which will guarantee an efficient and not too harsh wash.

Never use any type of scraper or steel wool-which will scratch the surface of the items.

Do not leave food residue for a long time on decorated parts, such as salt, lemon or vinegar to prevent corrosion.

## **Linen tablecloth**

### **Dry cleaning and ironing**

Dry clean with any solvent except for Trichloroethylene  
Iron your pieces while still damp or slightly soak them before ironing at about 150° C or 300° F

Steam iron embroidered pieces from the back side and always make sure your iron is clean.

### **Hand or machine washing**

You can wash your linen in cold or lukewarm water. This softens fabrics and enhances the sheer and luminosity of the fiber. Use neutral soaps and detergents without optical brighteners which don't contain small blue (optical) quantities to whiten the fabrics. Only neutral detergents keep the colors of your product the same over time.

Dilute the soap in water prior to emerging your linen to avoid stains from detergents. Don't wring.

We recommend not to tumble dry your linen, or only tumble dry at low temperatures.

### **Stain removal**

Red Wine: put salt and white vinegar or salt and lemon on the stain and rinse the linen immediately after the treatment

Wax: carefully eliminate as much as possible of the wax mechanically and then iron the linen with a sheet of absorbent kitchen paper above and one under it. Repeat ironing until the stain disappears.

Grease - Oil - Sauces: use talcum powder to absorb grease or pre-treat with stain removing commercial products without bleach, then wash as usual

Fruit: Put salt and white vinegar or salt and lemon on the stain, rinse thoroughly and wash

Ice-cream: wash with cold water and detergent

### **Don't do's**

Avoid the use of bleaching agents and, if needed, only on white fabrics, use hydrogen peroxide based products.

Don't use wool detergents. They contain softeners which lead to the swelling of the linen fiber and reduce its resistance over time.

Unfold the linen prior to putting it in the washing machine and don't use a high spin speed.

## **Glasses**

Industrial, eco-friendly, innovative and ultra-clear crystal glass, compliant with ethical and environmental standards, made with the care typical of artisanal production.

Threads and initials are hand-painted in gold or platinum.

### **Maintenance of glasses**

We do not recommend daily dish-washing especially for glasses that contain gold or platinum.

In case of use of dishwashing machine, make sure that the end of the cycle the items come out perfectly dry otherwise wipe them thoroughly by hand with a soft cloth.

We suggest to use branded dish-washing products which will guarantee an efficient and not too harsh wash.

Never use any type of scraper or steel wool-which will scratch the surface of the items.
